PRO-TEC Valves and Injection Cleaner

High-performance cleaner for all petrol engines

High Performance Valves and Injection Cleaner:

- improves motor performance
- removes carbon deposits on valves, intake area and in the entire combustion chamber area
- removes deposits throughout the whole fuel injection system
- ensures a clean and powerful combustion
- optimises emission values
- guarantees optimised injection dosage and fuel vapourisation
- gives optimal engine protection, increases the life span of the engine, ensures smooth and soft motor running

Directions for use

Add every 6 months to the fuel system before filling up with petrol. Treats 80 litres of fuel.
